

Pour chaque exercice :

- 1- Calculer l'échelle numérique en donnant le détail des calculs.
- 2- Calculer l'équidistance des courbes de niveau en indiquant la méthode utilisée.
- 3- Construire sur papier millimétré une échelle correcte des altitudes et exécuter le profil topographique suivant le trait de coupe indiqué.
- 4- Orienter correctement le profil.

TP n° 2 (1/2)

TP n° 1 - CARTOGRAPHIE - Profils topographiques
